

MLS LASER

Many dental procedures can cause temporary pain, inflammation, and the need to heal.

Modern dentistry has come a long way, constantly innovating with the integration of advanced technology to provide better patient care.

The Multiwave Locked System (MLS) Laser is a revolutionary dental tool that combines two synchronized wavelengths for optimal therapeutic effects, reducing pain, inflammation and jumpstart healing.

MLS LASER THERAPY

THE MULTIWAVE LOCK
(MLS) SYSTEM FOR
DENTISTRY

BENEFITS OF MLS LASER THERAPY

- Reduce inflammation
- Manage pain
- Jumpstart healing

Unlike traditional dental lasers, the MLS Laser provides simultaneous anti-inflammatory and analgesic effects, ensuring faster recovery and less pain.

WHY CHOOSE THE M HI-D LASER FOR YOUR TREATMENT?

We believe in kick starting your body's natural ability to heal by using advanced dental techniques with minimal discomfort.

MLS laser therapy uses a patented synchronized dual laser method to jump-start the healing process on a cellular level allowing healing to begin immediately.

As a result, you experience reduced swelling and inflammation that hinder your range of movement and worsen pain.
